Subject:	ABTraceTogether APP

The Alberta Government in working with Alberta Health to assist Albertans to know if they have been in contact with someone with Covid-19.

NAS is asking you to down load this app onto our NAS cell phones as a safety measure it is strictly voluntary if you chose to put it on your personal phone. There is no expectation that you carry the agency phone during your time off it is strictly an opportunity to have more precautions available to you when you are working.

ABTraceTogether is a mobile contact tracing app that helps to let you know if you've been exposed to COVID-19 – or if you've exposed others – while protecting your privacy.

Quickly identifying and isolating positive cases is an important part of our response to the COVID-19 pandemic, and preventing the spread.

The more Albertans who voluntarily download and use the app, the safer we'll be, and the faster we can reopen the economy.

Download ABTraceTogether now

Help keep yourself and others safe

When you venture out in public, avoid close contact with others and use the ABTraceTogether app.

ABTraceTogether uses your phone's Bluetooth to keep an anonymous log of other app users you've been in close contact with.

Please view to get more information and instruction of how to download on your phone

Thank you for your attention

Let's work together to stay safe.
